

Lacto Spark

Lactate Measuring System

Features:

- ▶ 0.5 μ L Blood Sample Volume.
- ▶ 5 Seconds Fast Test Time.
- ▶ No Coding.
- ▶ Large LCD Display.
- ▶ Strip Ejection.

Strip Advantages

Specifications

| | | |
|----------------------|---|------------------------------|
| Lactate ranges | : | 0.2 - 25 mmol/L |
| Analysis time | : | 5 sec |
| Sample volume | : | 0.5 microliters |
| Sample | : | Whole blood |
| Sample mode | : | Capillary |
| Fill detection | : | Automatic |
| Display | : | 48 mm (diagonally) |
| Battery | : | CR2032, lasts for 1000 test |
| Shelf life of strips | : | 15 months (from manuf. date) |
| Strips packing | : | 25 and 50 No's |
| Memory | : | 500 Readings |

Laser Patterning

Ensures excellent precision.

Soft Inserting Test Strip

Inserts the test strip easily and smoothly.

Lacto Spark is india's first, next generation, highly advanced ultra low volume lactate monitoring system available at affordable price. This Lacto Spark uses highly advanced biosensor technology and requires 0.5 microliters sample volume and presents result in 5 sec.

Lacto Spark uses carbon electrode with laser patterning to ensure precise results. **Lacto Spark** strips are manufactured with tight tolerances and do not require any coding. **Sensa Core's** biosensor technology solves a number of immediate technical problems related to Lactate strip by significantly enabling sensitive and accurate performance of Lactate strip in a cost-effective way.

Safety Lancet

Sterile, disposable, auto disabled finger pricking lancets.
